AQUATIC INSECTS AND STREAM ECOLOGY

June 3-4, 2006 (Sat - Sun)

Lycoming County

Greg Hoover and PICE Instructors

During this class, you will learn from a recognized expert how to identify aquatic insects that live in the streams and rivers of Pennsylvania. This course will offer "hands-on" instruction on the use of dichotomous keys to identify specimens of aquatic insects and their relatives. Sampling, collection, and preservation techniques for aquatic insects will also be addressed. Biology, behavior and ecological requirements are presented in an informal, highly enjoyable atmosphere. In early evening, there will be free time provided for anglers to learn the art and skill of fly fishing and fish some of Pennsylvania's pristine streams (fly rods and gear provided). Tuition: \$350; includes meals, shared accommodations and instruction. ACT 48: 12 CPE credit hour. (*One (1) graduate level credit (Masters of Education Program) is available through Cedar Crest College. An additional fee will apply). DEADLINE EXTENDED: MAY 5, 2006.

You can download a catalog with 2006 class listings and registration/scholarship information at www.PICEweb.org
